Laser Diode Drivers

The LDD series are economic QCW laser diode driver modules designed to provide high current pulses to drive 3m.i.k.r.o.n.TM laser modules in various applications. The drivers deliver output currents up to 300 A and pulse widths variable from 50 μ s up to 1000 μ s operation ⁽³⁾. Up to 1000 W average output power is available with the supplied heatsink. Several safety features are integrated to protect both laser module and laser driver.
